Dear Music Professional:

One of my greatest joys as a Producer/Engineer is bringing exceptional people together - there is nothing more satisfying than introducing a client to an artist who will help my clients realize their dreams. This is not entirely altruistic on my part! When I refer a player that takes a recording to a new, fantastic and unimagined place it makes me look good! I feel good too - "hey I'm a great producer - look what I helped you find!" I would like to introduce you now to an artist who, for over thirty years, has been my first call, my one and only call, when I need incredible harmonica parts and impeccable and outstanding musicianship - his name is Clint Hoover.

Clint and I have made over a dozen major recordings and have done countless sessions together. First thing you have to know about Clint is that he is one of the greatest collaborators ever. Did I also mention that he has a relentless professional work ethic - punctual, courteous, kind and focused - he does! He will listen to your music and you to understand what you want - and then he will make it happen! Need a burning dirty blues line - out comes the diatonic harp. Need something lyrical, precise, melodic and soulful - out comes the chromatic harp. Clint has a bottomless well of creativity and an insatiable need to make great music. I have never worked with a more devoted and hard working session musician than Clint. He is the real deal!

So - it is with great pride I introduce and recommend you to Clint Hoover for your recording pleasure! He will make your clients music come alive. He will make you look good and - most importantly - he will make beautiful music for you - shaping and creating it on your next session!

Clint has many musical samples - many of which I am proud to say I recorded! Please consider him for your next project or session. You will be blown away!

Sincerely,

Matthew Zimmerman
Owner of Wild Sound Recording Studio
